Period: \*below normal/normal/above normal

Forecast is consistent when observed and predicted (tercile with the highest probability) categories coincide (are in the same tercile).

Forecast is near-consistent when observed and predicted (tercile with the highest probability) differ by only one category (i.e. terciles 1 and 2 or terciles 2 and 3).

Forecast is inconsistent when observed and predicted (tercile with the highest probability) differ by two categories (i.e. terciles 1 and 3).

## Summary Statements:

### Rainfall for February 2014:

During February, fifty percent of stations in the 3 regions received ***Above Normal*** rainfall with ***Below Normal*** to ***Normal*** rainfall received in other stations.

### Accumulated rainfall for December 2013-February 2014, including outlook verification

Rainfall over period Dec 2013 – Feb 2014 was ***Normal*** across all regions while ***Above Normal*** rainfall was received in Misima, Nadzab and Momote station.

The SCOPIC forecast for the 3 months period were ***Near-Consistent*** at a majority of stations, ***Inconsistent*** at 2 stations and ***Consistent*** at Misima. However Port Moresby shows climatology. The skills ranged from very low to high.

### Outlook for -April-June 2014:

#### 1. SCOPIC:

The SCOPIC seasonal rainfall outlook for April to June 2014 shows:

- the most likely outcome for Madang and the Southern Region is above-normal, with normal the next most likely;
- the most likely outcome for Nadzab is normal, with above normal the next most likely;
- there is equal chance of normal and above-normal for Wewak, with below-normal the least likely; and
- there is little guidance for the coming season for Vanimo and the New Guinea Islands as the chances of above-normal, normal and below-normal rainfall are similar.

#### 2. POAMA:

The POAMA Model favours ***Below Normal*** across the country.

**NB: The X LEPS % score has been categorised as follows:**

Very Low:  $X < 0.0$

Low:  $0 \leq X < 5$

Moderate  $5 \leq X < 10$

Good:  $10 \leq X < 15$

High:  $15 \leq X < 25$

Very High:  $25 \leq X < 35$

Exceptional:  $X \geq 35$
